

Maverick Designs Meet The Strength Of An Ox

A **SANDHAR FMKIN** Product
Made In India

OCT 2022

ABOUT US

We aim to make heads turn with our helmets while keeping them safe. Our vision is to rule the hearts of every Indian biker with our products that bring lots of focus and perception to an oft-ignored aspect of on-road equipment, namely helmets. Bringing the best of technology, innovative features such as aerodynamic design, extra safety features and oodles of style, our products are made accessible all across the country with an extensive distribution partners network.

MAVOX[®] helmets have been specifically designed after evaluating the condition of Indian roads and traffic at a granular level. We aim to incorporate all the things that a rider seeks from their helmets and combining them with the insights obtained from our in-depth research. Uniting both these aspects gives the riders a helmet that gives them the power to 'Beat the Odds!' on every road.

With a vision of ruling hearts of every biker of India with our products, we aspire to lead the two wheeler's helmet industry of the nation. We aim to provide high quality and comfortable products to our riders.

SANDHAR AMKIN Industries Pvt. Ltd.

MAVOX[®] is a flagship product of Sandhar Amkin Industries Pvt Ltd. MAVOX[®]'s vision is to successfully devise innovative technology and futuristic design for manufacturing Helmets.

BEAT THE ODDS

A rider comes across innumerable challenges on the road while heading towards a new destination every day. Beat all these odds with Mavox Helmets and be the conqueror of the road.

STRENGTH OF AN OX

STATE OF THE ART TECHNOLOGY

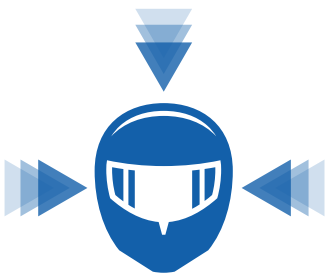

REDEFINING QUALITY

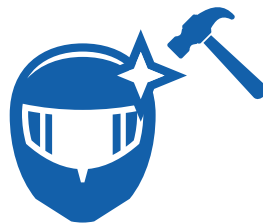

TESTED FOR ULTIMATE SAFETY

Safety You Can Rely On

IMPACT ABSORPTION TEST

Determines the impact energy that a helmet can absorb when dropped from a certain height.

RIGIDITY TEST

Determines the rigidity of the shell of the helmet by measuring the deformation of the helmet shell when progressively more load is applied up to a set limit.

RETENTION TEST

Determines the dynamic displacement, residual displacement and damage to the retention system in order to assess the suitability of the helmet.
